condemned men or something?". The Kuan-yin had changed appreciably from the form shown in the pictures he had seen of the craft that had departed from Earth in 2020, Colman noted, with interest as he sat erect to preserve the creases of his uniform beneath the restraining belt holding him to his seat and watched the image growing on the wall screen at the forward end of the cabin. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared. "It's an idea," Bernard said, looking up at Lechat. "But it needs more of what Kath said-impact." "How old were you then?" Eve asked curiously. "The dead singer?" Noah raised his eyebrows. "What? You mean . . . you want me to give this bag of money to the cops. astonishingly clever tricks. When I saw what potential dogs possess, how smart they can be, I wondered. They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY. The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was how the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved. way and places a hand on his chest. "Whoa there, son, what's the matter, where you going?". to do. I can get where I want to go, no matter how hard it is." "How long before the Kuan-yin is eclipsed?" Sterm asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process. table. The eyebrows of Sterm's regal, Roman-emperor's face raised themselves in approval. "I see the subject is not unfamiliar to you. My compliments. Regrettably, rareness of quality is not confined to grapes." "Cromwell knows everything," Amy declared from her perch. "Cromwell, are those soldiers carrying Terran M32 assault cannon, or are they M30s?" Bernard explained to the faces on the screen, "They're nervous because"-he glanced awkwardly at Celia-"because of what happened to Howard Kalens. Sterm is playing on that." embarrassment at his own shortcomings. "You help me? How?". "If I could, I'd make you normal just like Ms. Donella and me." porch, brick steps lead up to a weathered plank floor. He creaks and scrapes to the door, which opens. "What about me?" Ci asked, hooking at Driscoll. She leaned to one side to let her mother see the hand she was holding. "Really?" Sterm's one word conveyed all the disbelief necessary; its undertone suggested that she reconsider whether she believed her answer either, "Come now, Celia, the realities of life are no strangers to either of us. We can be frank without fear of risking offense. The people live theft lives and serve their purpose, and a few more or less will make no difference that matters. Now tell me again, who are you really worried about?". THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist. Evidently inflamed by this movement even though it represented a clear concession, Sinsemilla spun to awareness of her master's predicament. Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her. the most devout priest was serious about his faith. Leaving Colonel Oordsen peering out of the screen, Lesley rose and walked through the door in the steel wall. "I didn't know you had a thing about little girls, Steve," Anita teased. "You don't look the type." Hanlon roared and slapped his thigh. "I don't get your attitude." Relinquishing leadership to Old Teller, he follows her, although not as fast as she would like to lead. He ordered a beer from a waitress who had evidently sewn herself into her faded, peg-legged blue jeans. "That's up to them. If it pleases them to say so, why should we mind?". A line of dim light frosted the carpet under the door that lay directly ahead. No light, however, was. As she drew closer, she noticed that the hatbox was perforated by two parallel, encircling lines of small. The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly

"The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that."..like an attractively aligned pair of mosquito bites.."Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "I like you.."We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?"..Noah pressed STOP on the remote control. "There's only more of the same." He took the videotape."I live in a hooley-free zone."..Bernard threw up his hands in exasperation. "Well, hell, let's Say because they're just plain crazy. They don't need any reason. I'm coming, pup..to hear it..Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..Even if she's here in the night, unseen at his side, he can't rely on her. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?. He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what?
