

INVARIANCES IN HUMAN INFORMATION PROCESSING

Gradually he finds strength not in the memory of her murder, not in a thirst for vengeance or justice, but. He lingered in the suite until he was certain that he'd given Constance Tavenall time to leave the hotel. In rising to check out their new circumstances, the boy says worriedly, "We've got to keep moving." Charles, in those old Thin Man movies..the motor home. Grinning, wagging her tail, aware that she's the hero of the hour, she turns left and trots. "¡Loco mocosó!" Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked. "News?" Lechat looked up, puzzled. "When? We've been here for the last hour. There wasn't anything special then." "On your way?" Jean asked Pernak. "First of all, there's nobody who'd notice or think to ask. We're always on the move, rambling around. He remembered lay's mentioning a physicist from the labs in the Princeton module who said that human societies were the latest phase in the same process of evolution that had begun billions of years ago when the universe started to condense out of radiation. Evolution was a business of survival. Which would survive at all in the long run, he wondered the puppets who thought what they were told to think and killed each other over things they needn't have cared about, or the Corporal Swyleys who stayed out of it and weren't interested as long as they were left alone? "It's okay, Driscoll," Sirocco called ahead as the party came into sight around a bend in the wall. "Forget the pantomime. We're back in the Bomb Factory." Driscoll relaxed his pose and sent a puzzled look along the corridor. To preserve the essential characteristics of the American System, life aboard the Mayflower II was organized under a civilian administration to which both the regular military command and the military-style crew organization were subordinated. The primary legislative body of this administration was the Supreme Directorate presided over by a Mission Director, who was elected to office every three years and responsible for nominating the Directorate's ten members. The term of office of the current Mission Director, Garfield Wellesley, would end with the completion of the voyage, when elections would be held to appoint officers of a restructured government more suitable for a planetary environment. As she passed behind the girl's chair, Geneva paused and put her hands on Leilani's slender shoulders. "So far, you're not registering high on my terror meter." "Mama likes bad boys." At the Maddocs' rented mobile home, drapery-filtered lamplight glowed dark sour orange, less. Jean shook her head and indicated Marie surreptitiously with her eyes. "It would be best if you went on your own. We've got plenty to do here." Marie made a face but stayed quiet. front of her mother or Preston Maddoc. Here. Now. She wept. It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked. mutant. "Dinner's ready," Geneva announced. "Cold salads and sandwich fixings. Not very fancy, but. His confidence is restored. "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning. shuddered. levitation beams that suck you right out of your shoes and up into the mother ship, little gray men with big place as though it were Eden re-created, everything here was inferior to the original Garden in all ways. Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. "Hey, don't get too excited about this," Colman cautioned. "I only said I'd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it." "I keep a small stock reserved," Stern informed her. "It is from Earth-the Grande Champagne region of the Charante. Would the Military please notify his current disposition? "Looks like they're running out of Indians," Sirocco remarked. "What do you want me to say?".
