It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place. Perhaps when you've some free time, you'd like to meet some of the people here. If you like, I could mention it to them." Jay jumped up and ran to a closet for a jacket. He looked at Jean as he pulled it on. "Yes, Mother, I'll be careful." .For a few seconds Bernard and lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like." .to come and take a look." "I sure will." "Go away," Chang told it. "We're just looking today." "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply. "Yes," Sal replied. "Forty years ago this was just a few domes and a shuttle port. The main base that you came in through was only built about ten years ago. Back in the early days, the Founders started changing the designs that had been programmed into the Kuan-yin's computers, and the machines did their best to comply." She sighed. "And this is what it ended up like. We could change it, of course, but most people seem to prefer it the way they've always known it. There 'were some ghastly mistakes at times, but at least it taught us to think things through properly early on in 'life. The other towns farther out are all more recent and a lot tidier, but they're all different in their own ways." .of sassy and the wrong kind was tricky, but if you pulled it off, you would never leave them thinking. "If we're going to want a suite at the Francoise' again, I'd better reserve it now," Celia answered. "Any idea how many people we're talking about?" "Drugs do terrible damage," Aunt Gen said with sudden solemnity. "I was in love with this man in. a rattle of words raps out of him between guffaws: "Oh, damn . . . I'm splat... in the middle . . . of Forrest. The major sighed wearily. "It doesn't matter. Forget it. Do you know anyone else around here we should try asking?" "I don't know. It depends on the situation. Maybe. That's something else we'll have to leave to Sirocco to decide." "How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. It was clearly intended more to invite them into the conversation than as a serious question. They shuffled uncomfortably and exchanged apprehensive looks, unable to decide if she was serious or just slumming with the troops. CHAPTER NINETEEN. not exactly sure what perverts do, or why they do whatever it is they do, but he knows that secretly. Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Sterm won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?" CHAPTER TWENTY-EIGHT. clenched with such rage that she couldn't release the pole, she made her bid for being Quasimodo. "Me, on the other hand? I've got one pretty name followed by a clinker like Klunk. Half of me is sort of. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Sterm or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Sterm wasn't so strange. And it didn't seem so unnatural that she should have stayed near Sterm after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?" He returned to the Bowery, where a couple of businessmen out on the town bought him a drink. They were concerned about the rumors of possible trouble because they had big plans for expansion on Chiron, and they pressed Colman for inside information from the Military. Colman ' ~d he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it So that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. The Chironians weren't really people, after all.. circus had not played an engagement here.. "And Alec Baldwin," Micky assured Leilani, "wasn't the man who held up Aunt Gen's store." her shame hadn't arisen from her rudeness regarding Micky's drinking any more than it had been caused. Paralleling each other, these two vehicles move north, toward Curtis. They grind along slowly, sweeping. Lechat stared at her, but his mind still hadn't untangled the full implications. Beside him Colman's jaw clamped tight. "Somebody faked it to look like the Chironians did it," Colman grated. "She's not in any condition to feed herself right now. Maybe if I helped her into a chair and fed her. them around the base later; nobody had seen them at the perimeter; nobody had flown them out; and an intensive search carried on all through the night had failed to locate them anywhere. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. Yet she had the curious and unsettling sensation of movement within, of a turning in her heart and mind.. And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock.. Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. Her hair was already fled high from wearing the wig, but she spent a while studying the cap in the mirror and making some adjustments before she considered herself passable. She was. Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. He looked down instinctively at the breast pocket of his jacket. Veronica, a practicing architect, was there with Casey, Adam, and Barbara. Celia had declined to return to the ship but was watching from the home that she shared with Lechat - on the coast; and Wellesley had taken a trip from his farm in Occidena to see his old ship recommissioned and renamed.. Noah pressed STOP on the remote control. "There's only more of the same." He took the videotape. coconut oil, three yellow butterflies as bright as gift-box bows? suddenly seemed full of meaning.. The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system." Colman had been expecting something like that. "I know one unit of the Army that could do it," he said. "And they operate best when nobody's trying to organize them." "I will not be a party to such shenanigans' the Judge exclaimed. "This is all highly irregular, as you well know. A ruling must be subject to all due process, and only to all due process. There the matter must remain. What you are asking is inexcusable." the closet door with ease. Grunting, she shoved and shook it out of her way.. Paula was looking at him impishly. "Do you think you could beat mine?" she asked in a curious voice.. The rattletrap engine turned over on the first try. The other car had always needed coaxing. The. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." Smiling, reaching down to stroke the lovely lady's head, the trucker says, "I guess you'll be all right with. The truck rolls southwest into the night, with the twin fuses on the blacktop raveling longer in its wake.. Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death- a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written.. "Except for the shooting." "I'm just a kid." Merrick nodded gravely. "Of course, dear." Geneva slid the dish of garnishes across the table..The painter shrugged again. "That's okay. Different people value things differently. You can't tell somebody else when they've had enough to eat." In the driver's seat, the startled woman comes unstartled enough to speak, but the boy can't make out shrubs, where moon-silvered trees stood whisperless in the warm still air..After trembling against the boot toe, the five-dollar bill blows free . . . and twirls under the truck.
