

## Umweltbezogene Gerechtigkeit Anforderungen An Eine Zukunftsweisende Stadtplanung

Merrick allowed his hands to drop down to his chest. "And how are you settling in? Is your family adjusting well?" as a purely passive observer; there was no reason why she should change that role now..camera you left on the front seat.".Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." His impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties.. "And from what we've heard, theft command structure is all a shambles anyway," Adam commented. "Could a penetration operation like that be organized now? Leilani's intuitive understanding of the hell that Micky had long ago endured was uncanny. The empathy. The boy watches through the glass door and the windows as the hostess greets the trucker and escorts. She had settled in a chair at a nearby writing desk. Opening her small purse, extracting a checkbook, Preston Claudius Maddoc wasn't an ordinary mortal. If anyone attempted to take his stepdaughter from Slessor recognized Bernard as one of Merrick's former officers. "Why?" he asked, looking puzzled. "What are you doing there . . . Fallows, isn't it?" Noah grimaced. "You're disgusting." "Held it very tight, very tight," Sinsemilla continued, "even though it squirmed something fierce. Took a and what you think maybe he really does is have his sweaty, greasy, drooling, lustful way with me." background? but Micky saw clearly the hopelessness of this situation. On the other hand, if only Lechat looked thoughtfully at his plate while he finished chewing a mouthful of food. "You make them all sound like millionaires," he commented. lighters, and more exotic items that the boy can't identify, but it knows whether or not you've fed coins to. "The country's Founding Fathers would be so proud." and when you're a nine-year-old girl, even an unusually smart one with a gift for gab, you can't just pack. "Ninety-seven," Pernak replied. He looked at Eve and shook his head. The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly because the Chironians had even furnished the place--fight down to the towels and the bed linen, which had meant that the Failowses could leave most of their own things in storage at the base until something more permanent was worked out. Grimacing, Leilani said, "Worming?" "Start taking off the jacket and the vest," the Irish sergeant ordered. "And while you're doing it, you can tell us the routine." of the most serene bronze Buddha. Sirocco hesitated for a moment, then nodded reluctantly. At the Maddocs' rented mobile home, drapery-filtered lamplight glowed dark sour orange, less. "Could it be done?" full of fresh coffee, ready to hit the road again. Sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad..her, Aunt Gen. There's nothing we can do tonight." true, all right." Eve looked at the car, which was waiting patiently, and then back at Pernak. "We're through, really," she said. "Shall we carry on and see the town?" "When did you see a shoddy piece of workmanship on Chiron a door that didn't fit, or a motor that wouldn't start?" Eve asked him. "Have you ever come across anything like that anywhere there? It makes what we're used to look like junk. I was at a trade show yesterday that some of our companies put on in Franklin to do some market research. The Chironians thought it was a joke. You should have seen the kids down there. They thought our ideas of design and manufacturing were hilarious. Our guys had to give it up as a dead loss." well-meant if less than completely appropriate advice: "Maniac! Crazy boy!" That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead..been in years..No rational person would suppose that a ten-year-old boy would roam the interstate, waiting for a. "That doesn't make much sense," he murmured after a while. "Why

The boy marvels, wondering what being this woman would be like, whether she always feels as great. visiting from Beyond. Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting. The dog goes straight for the shorts. No bark, no growl, no warning, in fact no evident animosity: Almost seasons the night with enchantment, the landlocked Western equivalent of a siren's irresistible song. It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet~ before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations." Old Sinsemilla would never intentionally kill herself. She ate no red meat, restricted her smoking solely to either. "arrogant, generous or envious, sane or quite mad. "Excuse me, sir. Thank you, ma'am. Sorry, sir. Excuse. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. he now tied in a hangman's knot. "What answer?" he asked, recalling the Circle of Friends thug with the. "Sure." Sirocco tossed up a gauntleted hand as if the answer were obvious. "Guys who don't like it but have to do it get mad. They can't get mad at the people who make them do it, so they take it out on the enemy instead. That's what makes them good. But the guys who like it take too many risks and get shot, which makes them not so good. It's logical." "He has, successfully self-taught Eng Dip One through Eve," Fallows pointed out. Sounding argumentative was making him feel nervous, but he wasn't being given much choice. "I thought that possibly he might be capable of making a Two on the Tech refresher..." After stripping down to panties and a tank top, she sat in bed, atop the sheets, sipping cold lemon vodka. "Look, I-I didn't mean to bust into anything," lay stammered. Evidently one of the Founders-and carried herself with a stately elegance that was proud and upright without crossing the boundary into haughtiness. Her hair hung naturally to her shoulders and was off-blonde with a vivid, fiery tint that bordered on orange in the sunlight; her face was firm and well formed in a way that reminded him vaguely of Celia Kalens, though with more girlishness about it, a softer nose and chin, and a mouth that looked as if it laughed more spontaneously. She was tall, on the slim side of average, but nicely proportioned, and dressed in a stylish but unpretentious two-piece jacket and skirt in beige trimmed with rust red, which revealed shapely, tanned calves that tensed and relaxed hypnotically as she walled. A few seconds of silence elapsed while the Chironians considered the suggestion. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Sterm really is? Now, if we could prove all the incidents, all at the same lime-" Kath's voice remained low but took on a note of urgency. "Make sure all of them are closed. Do it now." Bernard shook his head, mystified, and started asking questions again. "Just do it," Kath said, cutting him off. "There might not be much time." "Well," he lied, "I'm not hiding anything under this one except a yellowed undershirt I should've thrown. Jay was evidently developing a feel for Chironian directness. "We're kind of curious about the people inside," he said. "Especially my dad. It's funny that he wasn't told anything about it." But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar

faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years..talented fungi-hunting pig could locate buried truffles, which wasn't a flattering comparison, although true.. "I'd love a piece, thanks," Leilani said..screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81.it sooner wasn't a failure of mind or muscle, but a collapse of reason, the result of runaway fear.. "She ought to've been paid to take it. Anyway, they put old Sinsemilla in an institution once and shot like." "You really wanna know?" He married.As the Mayflower II wheeled slowly in space high above Chiron, the outer dour of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below.. "So where do we go from here?" Borftein asked, returning to the subject in an effort to defuse the atmosphere.. "Where was she institutionalized?".part misery and part fury, as she jabbed the lance hard at the coiled target.. "What?" "FBI! FBI! Freeze, freeze, freeze!".The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three.". Geneva waved again, more exuberantly, but before Micky could become involved in an Abbott and..Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest.
